Workshop Usage of Study base App

Resource Person: Mr. Vijay Gehlot

Attendees:

1. Preprimary Teacher
2. Primary Teacher

There was a workshop of Studybase applications organized in MPS on 17th of May 2022. Near about 20 teachers attended the workshop. We learnt different features of Studybase. It is school management software. Easy to use and provides insight to crucial analytics about schools, classrooms, students, teachers and assessment in a single convenient dashboard.

Studybase maintains separate records for every student and enables access to complete information with just a single click. Student's information includes personal details, photographs, fee details and attendance etc. It allows create several students reports. Studybase designs a curriculum for the classes with lessons covering various topics

The pre-designed curriculum manages the progress and performance of teachers. We can also attach documents, pictures and videos and send information to the parents. This helps to maintain transparency. Moreover, this whole process of transfer of information is secure. The teacher seemed to be more digitalized-equipped and felt that this training will help and enhance their teaching skill.
